# SPEECH OF FOUNDER AND CEO

## Md Delour Hossain Nion

Founder & CEO  
+88 01717722134

Now a day, new automobile technology has been advancing rapidly in the latest world. The demand for vehicle service and maintenance has become more sophisticated because of the introduction of advanced automobile technology. We are one of the most professional in the respective field here in Bangladesh.

Speed Auto Care is one of the latest & modern private car service providers in Dhaka city which is equipped by the modern technology, hybrid care equipment & expert engineer & technician. Your care is our best inspiration to service the best. The Speed AUTO CARE commenced vehicle repair operations in the beginning of 2016 and has undertaken repairing and maintenance services of all types of light & medium vehicles including up gradation of any cars as well as periodical layup repairs and life extension of vehicle etc. The Speed AUTO CARE has developed adequate capabilities to handle complex and sophisticated mechanism of different car models manufactured globally.

We do conduct a three-stage inspection process. The respective team leader ensures quality of the services, accordingly handed over vehicle to the QAD (Quality Assurance Department). Finally QC (Quality Controller) grant permission to deliver the vehicle once quality service verified and satisfied himself.

## Machineries

### Automotive Diagnosis Machineries

“ We use this diagnosis to check full history of Car performance and variant of it's electrical coding to determine the condition of each mechanical part of full car health system. ”

 Computerized Engine Analyzer and Emission tester.

 Computerized Scanner.

### 3D ALIGNMENT & BLANCING MACHINE

#### 3D Wheel Alignment Machine

It sometimes referred to as breaking or tracking is part of standard automobile maintenance that consists of adjusting the angles of wheels so that they are parallel to each other and perpendicular to the ground. The purpose of these adjustments is to reduce tire wear and to ensure that vehicle travel is straight and true (Without pulling to the side). Benefit of 3D Alignment, it's a latest technology where can see the four wheel adjustment system at a time and it saves time and guise smoothly ride and to extend the service life of tires.

#### BALANCING MACHINE

It is particularly important in today's vehicle. When wheel rotates sometimes may causes it to hop or wobble, which can cause ride disturbances, usually vertical and vibrations through this machine imbalance wheel are cured and gives the car it's smooth ride again.
